The principals of SSE have played a major role in the evolution of tiered stadium seating systems for more than a decade. Beginning in the early 1990's, we participated in the design and construction of some of the nations largest and most well-known stadium seating theatre complexes.

Starting with the 24-screen AMC Grand in Dallas, Texas which opened in 1994, SSE professionals made their mark on the industry as the constructor of the first Megaplex in the nation and the first theatre auditoriums with modern state-of-the-art stadium seating.

From the beginning we have participated in a leadership role in the design and construction more than 5,000,000 S.F. of state-of-the-art stadium seating projects in 21 states from coast to coast.

We are now recognized as the most experienced and innovative company specializing in the design and fabrication of tiered stadium seating systems in the industry.

"...AND THE OSCAR GOES TO STADIUM SEATING ENTERPRISES."

for their award winning performance in retrofitting Brenden's 16—Pittsburgh. SSE was able to accommodate our demanding and tight schedule in time for the holidays...

I am still amazed at how quiet construction was so we could show film in the adjacent auditoriums. What a great idea to have the pre-fabricated steel ready for each retrofit.

I look forward to working with you again.

Bruce Coleman
Executive Vice President
Brenden Theatre Corp.

I would like to take this opportunity to express my personal thanks and gratitude, as well as extend the same on behalf of TrizecHahn Development in acknowledgment of the efforts of you and your project team.

...Your team performed a service for our company that did not go unnoticed. This project was incredibly difficult yet you performed in a fashion that is unfortunately rare these days.

SSE did not look for excuses as to why something could not be done but rather determined how best to do it.

Kevin Dennis
Vice President
Design and Construction
Trizec Hahn Development
